03. STRATEGIC GAP ANALYSIS: WHAT WE NEED TO IMPROVE

> **Strategic Priority:** Having telemetry deployed in code is the first step. The 3 critical administrative actions (P0) below must be finalized in Google's consoles to begin capturing real organic data and conversion metrics.

PRIORITY	GAP / ACTION ITEM	WHY IT MATTERS & STRATEGIC IMPACT	RESPONSIBLE OWNER	TARGET DATE
P0	GSC Property Verification	Without verified ownership, Google will not release real click, impression, CTR, and search query data.	Nomeshwer Sharma	Immediate
P0	Client GA4 Measurement ID	Replaces development measurement tag with client's active Google Analytics 4 stream ID to record live visitor volume.	Technical Team	Next Release
P0	GA4 "Key Events" Flagging	In GA4 Admin, mark the 4 deployed custom events as Key Events (Conversions). Without this, GA4 reports conversions as 0.	Nomeshwer Sharma	Immediate
P1	Link GSC & GA4 Accounts	Enables Search Console reports directly inside Google Analytics 4, connecting specific queries to on-page conversions.	Nomeshwer Sharma	Week 1
P1	OpenGraph & Twitter Cards	When clients share `taniyadsilva.com` on LinkedIn or WhatsApp, generates a rich preview card with high-res banner.	Technical Team	Cycle 2
P1	Thought Leadership Articles	**The Largest Untouched Lever:** Publishing 3–5 cornerstone advisory articles ranks the site for unbranded terms like "agrarian transitions advisory".	Client & Content Team	Q4 2026
P2	Institutional Backlink Profiles	Securing authoritative backlink citations from affiliated entities (The Resilience Collaborative, ILSS, RegenIntel, L'express).	Advisory Team	Ongoing
P2	International Geo-Targeting	Optimizing meta signals for global development organizations headquartered in Geneva, Washington DC, London, and Singapore.	Technical Team	Month 2
